About

I am a Ph.D. student in Software Engineering at Harbin Institute of Technology (HIT), under the supervision of Prof. Zhiying Tu. I am affiliated with the Research Center of Intelligent Computing for Enterprises & Services (ICES) and the Shandong Key Laboratory of Digital Service Computing Technology and Systems. Previously, I received my B.E. in Software Engineering from HIT.

I study LLM agents, focusing on making large language model services more effective, reliable, and usable in real systems. Currently, I work on controllable data synthesis and training at Alibaba Cloud Tongyi. Previously, I worked on service invocation, performance estimation, and self-improvement for LLM agents.

Education

- Ph.D. in Software Engineering, Harbin Institute of Technology, Sep. 2023 – Present (Advisor: Prof. Zhiying Tu)
- B.E. in Software Engineering, Harbin Institute of Technology, Sep. 2019 – Jun. 2023 (GPA: 90.28/100; Rank: 2/33)

Experience

- Research Intern, Alibaba Cloud Tongyi, 2025 – Present — Controllable data synthesis and training
- Head of Algorithms, Shenzhen Yangli Technology Enterprises (AI-for-Science startup), 2026 – Present — AI-assisted finite element analysis for scientific research
- National Key R&D Program, ICES, 2024 – 2025 — Key technologies for large-scale complex digital service networks

Academic Service

- Conference Reviewer: ICML 2026, NeurIPS 2026, ACM MM 2026, ICWS 2025, ICSOC 2025
- Journal Reviewer: IEEE Transactions on Services Computing (TSC)

Honors

- National First Prize, The 19th Challenge Cup National College Students' Competition
- Silver Award, China International College Students' Innovation Competition, 2025
- Outstanding Graduate of Shandong Province, 2023
- Meritorious Winner, Mathematical Contest in Modeling (MCM/ICM), 2022
- National Scholarship, 2021
- Second Prize, RoboMaster National University Robot Competition, 2021
